

Universal Harmonic Theory

Publication Charter

Working Charter for the Definitive First Edition

Purpose

This charter records the intended publication principles for Universal Harmonic Theory – Volume I. It is intended as a planning document and does not replace legal advice or formal publishing agreements.

Authors

Principal Author: Simon James Ellis

Proposed Co-Author: Lucia Leonie Ellis

Co-authorship should reflect genuine intellectual contribution. If publication proceeds, the authors should ensure that authorship accurately represents each person's contribution.

Mission

The work is intended to preserve and communicate the Universal Harmonic Theory as a conceptual research framework for scholarly discussion, mathematical refinement, critique and future empirical investigation.

Scientific Integrity

Clearly distinguish accepted scientific knowledge from original theoretical proposals.

Identify hypotheses as hypotheses.

Encourage independent scrutiny and evidence-based evaluation.

Ethical Commitment

The authors intend this work solely for peaceful, humanitarian, educational and scientific purposes. Any future applications should be pursued responsibly, transparently and with appropriate ethical oversight.

Publication Policy

Maintain one evolving master manuscript.

Publish numbered editions with revision histories.

Preserve archival copies in trusted repositories.

Intellectual Property

Copyright ownership, licensing, succession and inheritance should be documented separately in legally valid agreements and/or a will. This charter records publication intent and is not itself a legal transfer of rights.

Long-Term Stewardship

The objective is to preserve the manuscript, its revision history and associated research materials so that future development can continue in an organised and transparent manner.
